PROJECTS

Rural E-Health Web Application: In rural areas, a web-based application that uses HTML, CSS, JavaScript, Java, and MySQL allows users to enter patient symptoms and automatically assigns the doctor. A chat system enables communication between the user and the doctor regarding the patient's condition, and medications can be provided via chat.

Banking Application: Web application using JDBC, Servlet, and JSP pages to perform form actions on the database. The system works like a real bank where users can credit, debit, and transfer money.

Shopnexus E-commerce Project: Designed and developed an e-commerce platform for selling custom-made clothing. Utilised HTML, CSS, JavaScript, Bootstrap, MySQL, and Core PHP. Demonstrated strong web development skills and delivered a user-friendly online shopping experience.,

News Site - Daily News Portal: Designed and developed a dynamic daily news portal. Used HTML, CSS, JavaScript, Bootstrap, MySQL, and Core PHP. Highlighted proficiency in full-stack development and content management for a fast-paced news environment.
